
Focus on the sense of smell

OHARA PARAGIUM CHEMICAL CO.,LTD.

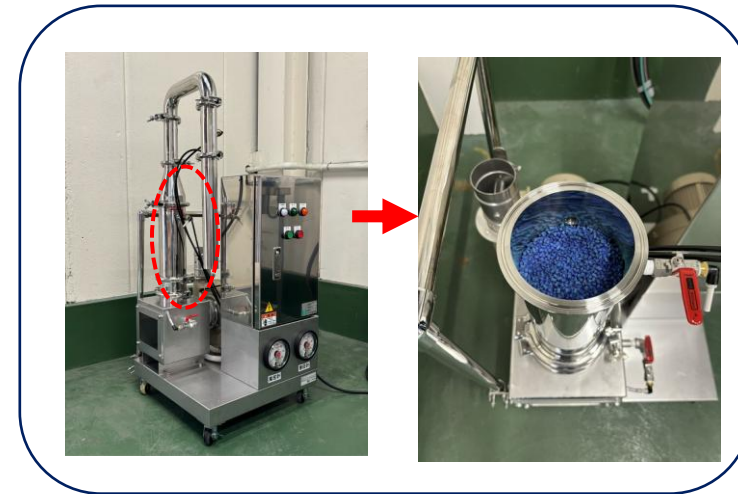

Gas Control Technology Business

Gas Control Technology	PCP/MOF	b.cave® (Using copper PCP)	Odor issues
			Harmful gas measures
			Equipment failure countermeasures
			Hygiene measures
	Molding Technology		DAC
			CCS、CCUS
	Materials other than PCP	Molding Technology	DAC
			CCS、CCUS

PCP/MOF is the material that won the Nobel Prize in 2025

**Honeycomb Filter
(Filling the OS)**

**Deodorizer
(Filling the OS)**

Instantaneous large-scale absorption of hydrogen sulfide, ammonia, etc.

- Effective in small amounts
 - Long-lasting effects
 - Contributes to environmental protection
(e.g., CO₂ reduction)
-

Improving the work environment [Protecting the working environment]

- Odor control
- Measures against harmful gases to the human body
- Hygiene measures such as anti-virus

Factories, nursing care, livestock farming,
water supply and sewage related,
civil engineering and construction, etc.

Equipment failure countermeasures [Extending the life of equipment]

- Factory precision equipment
- Hot spring towns
- Water supply and sewerage related

Odor and living environment improvement [Supporting future urban development]

- Surrounding area measures for factory odors
- Surrounding area measures for livestock odors
- Excrement odor measures
- Housing equipment, home appliances

Food-related [Supporting the food industry's efforts]

- Maintaining food freshness(cold chain)
- Dealing with odors during transportation(cold chain)
- Dealing with odors from food residues
(commercial facilities, etc.)

Usage example:

"Our products absorb odors and harmful gases that leak from conventional equipment."
